# Epson Color Works<sup>™</sup> C3500 Color Inkjet Label Printer

- Compact, robust design for commercial use
- High print speed of up to 4 inches/second<sup>1</sup>
- High-quality, four-color inkjet printing (CMYK)
- Individual ink cartridges for efficient use of ink
- Supports all major label applications
- Meets BS5609 certification<sup>2</sup>
- USB and Ethernet interfaces

Now you can dramatically reduce label costs, increase operational efficiencies and quickly produce high-quality color labels with Just in Time Color™ printing on Epson's high-speed ColorWorks C3500 printer.

### Color labels are the new standard

Today there is a growing demand for the use of color labels that feature color codes, photos and pictograms to highlight relevant information. This trend sharply drives up the number of label variations and increases label production complexity. Epson's ColorWorks C3500's ability to produce full color labels on demand makes it the ideal solution.

## Advanced features only from Epson

Epson's compact, four-color C3500 inkjet printer features fast printing speeds up to 4 inches/second, a banding reduction mode and a nozzle check system that produces a reliable output of high volume labels with excellent image quality. In addition, it offers multiple easy-to-use features such as an autocutter, easy paper loading and an LCD with printer status readouts.

# Superior print and ink quality

Epson's patented MicroPiezo® inkjet technology together with our DURABrite® Ultra Pigment ink ensures labels with crisp, clear, easy-to-read text and barcodes and vibrant graphics that resist smudges and water even on plain paper. And with the C3500 you can print on a wide range of media from plain, synthetic and matte to glossy stock. It handles roll-fed or fanfold, die cut or continuous label media.

#### Significantly lower your costs

With Epson's C3500 printer you can dramatically reduce the cost of your label operations. Instead of maintaining an expensive inventory of preprinted labels, you can print the labels you need when you need them. In addition, the C3500 features individual ink cartridges for a more efficient use of ink and a very low cost of maintenance.

# Reliable and flexible

Designed for high-duty commercial environments, the rugged C3500 is dust and water-resistant and built to last. It has an MTBF of 88 thousand hours.<sup>3</sup>

# Backed by the leader

The ColorWorks C3500 delivers the quality and reliability that Epson is known for and is backed by Epson's industry-leading service and support programs.

# Fast, Full-Color Label Printer for Just in Time Color Printing

Color-coded labels enable fast, accurate product identification.

The C3500 using Epson pigment inks is BS5609 certified for GHS labels 2

 $<sup>^{1}</sup>$ Speed is printing 2.2" (56mm) width bidirectional mode, with banding reduction disabled in 360 x 360 dpi

<sup>&</sup>lt;sup>2</sup>Epson's ColorWorks C3500 inkiet printer with Epson's DURABrite® pigment inks used in combination with Neenah Kimdura Poly media has been BS5609 certified.

<sup>&</sup>lt;sup>3</sup>Failure is a random failure occurring during the random failure period.

Inkjet cartridge yields vary considerably for reasons including item printed, print settings, temperature and humidity. Yields may be lower when printing infrequently. A variable amount of ink remains in the cartridge after the "replace cartridge" signal. Ink from the first cartridge is used for priming the printer. Ink is used for both printing and print head maintenance.
